Celebrating 50 years of Pink Floyd, the Laser Spectacular has become a cult classic, presenting the music of Pink Floyd as you have never seen it before. Surrounded by walls of concert quality sound, the Pink Floyd Laser Spectacular carries listeners away on a mind-expanding journey driven by cutting-edge effects, high-powered lasers, large screen video projection, and special lighting effects. It confronts the senses with an array of visual displays, choreographed to the soundtrack during this spectacular laser light show.

“Pink Floyd’s music is very dramatic and visual; you can imagine images when you listen to their music. Without any lighting effects at all, there is still a show in your mind,” says creator Steve Monistere. “Now imagine using lasers, lighting, video and other special effects to interpret what your mind is ‘seeing’. That is why people love this show so much - it touches on all of their senses.”

Every year new elements are incorporated into the show, so fans can expect new features this November.
